Annual medical examination of students.

Mr. B. Narasinga Rao, Mysore District Board.

Summary of discussion.—It has been noted by school-masters of experience that there seems to be some deterioration in physique and eye-sight of school-going boys, and it is therefore advisable that a system of annual medical inspection of Anglo-Vernacular Schools, High Schools and Colleges may be instituted. Such a system obtains in Japan at the present day. The heads of Schools may be requested to devote in their annual reports a paragraph dealing with the physical improvements of the boys, giving tabular statements showing the average height, chest-girth, weight, and condition of eye-sight of the boys in each class of the institution. These details may be furnished by the inspecting Medical officer.
